**TO WHOM IT MAY CONCERN**

I am writing with reference to Mr George Abraham, Director of George Andary & Company Pty Ltd, Project Managers and Construction Management Consultants.

I first had contact with George when he was responsible for a lecture theatre project in the Edward Ford Building in the late 1990s. I have had much more contact with him recently as George has managed very significant projects in the refurbishment of the Medical Foundation Building amounting to several million dollars and is currently also managing a large and complex project in the Anderson Stuart Building particularly the refurbishment of the Wilson Museum and of several other teaching spaces in that building. Those familiar with the Anderson Stuart Building in particular will know that any job in this historic structure is complex and requires meticulous planning and supervision. It is clear from the projects George has undertaken that he has an abundance of these skills.

On a more personal level I have always found George to be extraordinarily helpful, a good communicator, well on top of the projects he has in hand and invariably cooperative and responsive to any request made. He shows initiative and is always willing to endeavour to meet whatever unusual and challenging requests are put to him. Knowing that he has been in charge of a project for the Faculty of Medicine has in every case given me a sense of confidence that the project will be completed in the shortest possible time, at the highest possible standard of workmanship and at the minimum a realistic cost.

I would be more than happy to continue working with George on future projects.

Yours sincerely

Tom Rubin
